

IT420 Wk 6 Project SSRS Reflection

Interactivity makes the report way easier to use. I can click from category to product only when I need more detail, and the date range filter covers most quick questions. Hiding what I don't need keeps the layout clean. Overall, it helps me find answers faster without asking for a new report. What we just did really focus on scoping the data of what we want to see and when. This behavior only makes it easier to present big data in a way that easy to follow for those who are involve.
